Art Unit 1713

1. Applicant's election with traverse of Group III, claims 31-34 in Paper No. 11 is acknowledged. The traversal is on the ground(s) that there is no serious burden on the Examiner to treat all the groups together. This is not found persuasive because the judgment as to burden must be left to the Examiner, and the burden herein resides not only in different classifications entirely for some of the groups but in substantially different issues of patentability.

The requirement is still deemed proper and is therefore made FINAL.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 31-34 are rejected under 35 U.S.C. § 102(b) as being anticipated by Ameduri et al. in the article entitled "Synthesis and Polymerization of Fluorinated Monomers . . ." in the Journal of Fluorine Chemistry, Parts 3 and 4.

Serial No. 09/856,774

-3-

Art Unit 1713

Both parts teach entities which read on applicants' claims, and Part 4 reads on applicants' preferred embodiments and elected species. These references published on October 5, 1998, over one month before applicants' earliest priority date and over one year prior to the effective filing date of this application. The claims are, therefore, properly rejected under 35 U.S.C. § 102(b) as anticipated by the references.
